

Correction to Figure 11 (shown in red). The caption should be:

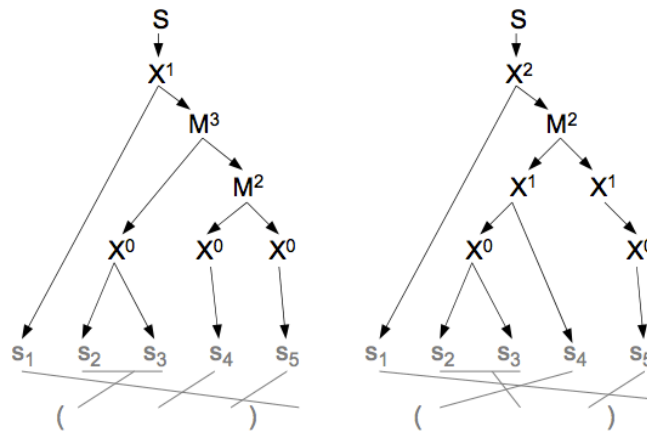

Figure 11
 Movement allowed by two grammars: shallow-1, with $K_1 = 2$, $K_2 = 3$ [left], and shallow-2, with $K_1 = 2$, $K_2 = 3$ [right]. Both grammars allow movement of the bracketed term as a unit. Shallow-1 requires that translation within the object moved be monotonic while shallow-2 allows up to two levels of reordering.

Or alternatively the trees should be modified as follows:

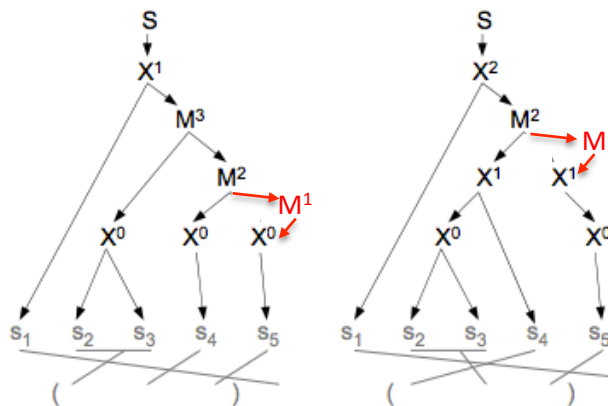

Figure 11
 Movement allowed by two grammars: shallow-1, with $K_1 = 1$, $K_2 = 3$ [left], and shallow-2, with $K_1 = 1$, $K_2 = 3$ [right]. Both grammars allow movement of the bracketed term as a unit. Shallow-1 requires that translation within the object moved be monotonic while shallow-2 allows up to two levels of reordering.

Many thanks to Ahmad Emami for spotting this, and kindly informing the authors.
